MOUSE MATH

“I can’t do math.” Every child (or grownup!) who says these words has at some point along the way felt intimidated by math. For young children who are just being introduced to the subject, we wanted to create a world in which math was not simply numbers on a page, but a part of life - an adventure!

Enter Albert and Wanda, two little mice who live in the walls of a People House. Children will be swept along with this irrepressible duo and their merry band of friends as they tackle mouse-sized problems and dilemmas (and sometimes cat-sized problems and dilemmas!)

Each book in the “Mouse Math"' series provides a fresh take on a basic math concept. The mice discover solutions as they, for instance, use position words while teaching a pet snail to do tricks *or* count the alarmingly large number of friends they've invited over on a rainy day-and, lo and behold, they are doing math!
