THESAURUS

- **calculate formal** to find out an amount, price, or value by adding numbers together: The students calculated the cost of printing 5000 copies of their book.
- **work out** to calculate something. **Work out** is less formal than **calculate**, and is more common in everyday English: You need to work out how much you will need to borrow.
- **figure out (also figure American English) informal** to calculate an amount: We still haven't figured out how much it's all going to cost. | the method for figuring welfare payments
- **count** to find out the total number of things or people in a group by looking at each one and adding them all together: The teacher counted the children as they got on the bus.
- **total (also total up)** to add a number of things together to get a final number: Once the scores have been totaled, we will announce the winner. | Okay, now let's total up who had the most points.
- **quantify formal** to say how much something costs, how much of it there is, how serious or effective it is etc: I think it's difficult to quantify the cost at the moment, for a variety of reasons. | How do you quantify the benefits of the treatment? | a reliable method for quantifying the amount of calcium in the blood
- **assess formal** to calculate what the value or cost of something is, or decide how good, bad etc something is: The value of the paintings was assessed at \$20 million. | They are still assessing the damage. | We need to have a better way of assessing students' progress.
- **estimate** to guess an amount, price, or number as exactly as you can, based on the knowledge you have: The police department estimates that the number of violent crimes will decrease by 2%.
- **put a figure on something** to say what you think the exact total amount or value of something is, especially when it is a lot: It's hard to put a figure on it, but the final cost is likely to be over £225 million. | The company has refused to put a figure on its losses.
- **project** to calculate what an amount will be in the future, using the information you have now: The company projects sales of \$4 million this year.
